August 1, 2026

Contents

I. A Chapter	1
1. A section	1
Bibliography	3
A. An Appendix	5

Sworn declaration

I declare under oath that I have prepared the paper at hand independently and without the help of others and that I have not used any other sources and resources than the ones stated. Parts that have been taken literally or correspondingly from published or unpublished texts or other sources have been labelled as such. This paper has not been presented to any examination board in the same or similar form before.

Saarbrücken, _____

Chapter I.

A Chapter

1. A section

This is the first chapter of this thesis' main part. Page numbering switches over from roman to arabic.

Citations

Citations can be done like this: [1]. The preferred citation style may be set in `Options.tex`.

Quotes

Quotes can be typeset as follows: “This is a quote”. They will be automatically typeset according to the chosen language.

Enumerations

(i) For enumerations that need not be particularly exposed (e.g. in an assertion type statement as inside a lemma, a proposition, a theorem or a corollary or in a definition), the option “wide” as set for this enumeration is preferable. It allows for better utilisation of the type are.

(ii) For enumerations as listed above, the option “wide” is probably not best suited.

Special environments and references

Special environments can be typeset as follows:

Theorem I.1.1 (Heine-Borel): *A subset $A \subseteq \mathbb{R}^n$ is compact if and only if it is closed and bounded.*

You can reference them as follows: Theorem I.1.1. If you just want the number and not the type of the referenced object, you can also use I.1.1.
